CAT. NO.	FINISH
VPK33CH	Polished Stainless (Polished Chrome Look)
VPK33BN	Brushed Stainless (Brushed Nickel Look)
VPK33BR	Polished Brass
VPK33ORB	Oil Rubbed Bronze

Frameless Vertical Post Systems in Stock or Custom Kits Allow User to Stabilize Fixed Panels of Glass Not Going to Ceiling

CRL now offers two styles of Frameless Vertical Post Systems used to stabilize fixed panels of glass for enclosures not reaching the ceiling. They provide an excellent alternative for those customers resisting the use of typical horizontal header systems. When patterned glass with decorative edges is used, and a header system cannot be used due to "rippled" top edges, the Frameless Vertical Post System allows an aesthetic and practical solution.

For applications where our stock units do not suffice, please request our Frameless Vertical Post System Custom Quote/Order Menu. By completing the menu to identify the unit of your choice, along with submitting a drawing of your enclosure, our Technical Sales Department can work with you to develop the perfect solution.
