

CRL Monterey Series Bi-Folding Sliding Door System

- Weather Resistant, Designed for Exterior Use
- Inward or Outward Stacking Positions Available
- For Use with 3/4" to 1-9/16" (19 to 39 mm) Insulating Glass
- Wood Grain and White Powder Coat Standard With Custom Colors Available
- Fully Assembled, Ready for Glazing

NEW!

CRL's long awaited and much anticipated venture into the great outdoors is finally here! We are excited to introduce our newest entrance door, the Monterey Series Bi-Folding Sliding Door System!

The Monterey Series allows you to bring the outdoors inside while providing resistance to undesirable weather conditions. Countless options are available to create large living spaces that seamlessly transition outdoors to indoors.

Our precision engineered components provide a system that slides smoothly with minimal effort while supporting up to 10 panels in a single opening. The Monterey Series provides security with multi-point locks that engage with a simple turn of the handle.

Weather Resistance

Double gaskets provide increased weather resistance

Durability

Dual guides in floor mounted track keep system hanging true and plumb, eliminating stress on hinges

Trouble Free Operation

Multi-point locks that engage with a simple turn of the handle

CRL Monterey Series Bi-Folding Sliding Door System

CRL Monterey Bi-Fold Sliding Door Systems are a contemporary way to maximize the space available in residential or commercial properties, while at the same time creating stunning areas with brilliant transparency. Use this Bi-Folding Sliding Door System as a room divider or simply as a patio door. When used as a patio door, a pivoting door can be incorporated into the system, which works the same way as a traditional patio door, or the entire bi-fold system can be opened, leaving an enormous wide open space. Our Monterey Series Bi-Folding Sliding Door System can accommodate door configurations ranging from one to ten leaves and allows them to be stacked with minimum effort to one or both sides (with a maximum of five leaves per side). Design options are virtually limitless. The sturdy, yet slim frame construction allows for more glass and less metal. The Monterey Series is designed for 3/4" to 1-9/16" (19 to 39 mm) glazing thickness, and the frames are available in white and wood grain powder coated finishes. Custom finishes also available.

Create Open Inviting Entrances

- Easy to Operate, Panels Open or Close Quickly

Invite passersby into your retail space or restaurant by opening the entire front to the sidewalk or mall promenade.

NEW!

Bring the Outdoors In

- Almost Seamless Transition

Open an entire wall to the outside, creating larger living spaces easily.

NEW!

Take the Kitchen Outdoors

- Several Stacking Configurations, and Inward or Outward Opening Options Available

Combine full height doors with windows above your kitchen counter and totally change the patio dining experience.

CRL Monterey Series Bi-Folding Sliding Door System

Stadiums and Sports Venues

- Versatile Pivoting Panel Option
- Flexibility to Fully or Partially Open

The Monterey Series is perfect for creating open, comfortable luxury stadium boxes that are both secure and weather resistant in the off season. The narrow profile of the vertical mullions lends to a relatively unobstructed view when closed. When opened you have the ability to move freely about the area without having to fumble with opening and closing swinging doors.

NEW!

Schools and Universities

- Bi-Fold Sliding Doors Offer Natural Light When Partially or Completely Opened

Create larger class spaces or special activity areas without expensive building expansion. Combine rooms for group activities or section off noisy ones. Our swinging door option allows easy access when system is in the closed position.

NEW!

Bi-Folding Window

- New Construction or Retrofit
- Commercial and Residential Applications

Enjoy the same features of a full height opening in a window application. Outward stacking position does not reduce your usable space inside.

Bi-Folding Windows run on an easy-slide track system and allow wide openings. They're ideal where homeowners or designers want to capitalize on views, capture summer breezes, or create a unity between indoors and outdoors.

NEW!

CRL Monterey Series Bi-Folding Sliding Door System

NEW!

The Monterey Series Bi-Folding Sliding Door System can include as few as two panels or up to 10 panels with a maximum of five panels stacking to a side. Single swinging doors are available to create a cohesive look throughout the project.

Maximum opening size is 23 feet (7 m) wide by 9 feet (2.7 m) tall. Openings wider than 16 feet (4.8 m) must split the panel stack to each side of the opening.

A standard Monterey Door can be glazed with insulating glass ranging in thickness from 3/4" to 1" (19 to 25 mm) using one of three glazing vinyls available.
