# Swing, Bi-fold & Sliding Glass Door Systems

## THE INKAN GROUP

The harmonious achievement of architectural design and structural durability through the marriage of four distinct divisions, to offer an unlimited range of products and services in architectural metal and custom fabricated tempered glass:

## RDM GLASS SYSTEMS DIVISION

Custom designed glass doors, sliding glass entranceways, squash and racquetball glass backwalls, suspended glass walls, glass kiosks; all engineered to make the architect's vision a reality.

## INKAN CONTRACT DIVISION

Supply and installation, from engineering to finished structure, for suspended glass walls, office interiors, shopping malls, balustrade, ensuring complete control of operations from manufacture to installation.

## INKAN ARCHITECTURAL METALS DIVISION

Superior quality in material and workmanship, using virtually any metal from aluminum or stainless steel to brass, bronze or muntz bronze. For creation of custom door hardware, balustrade, fascia, wall panels, decorative sculptures.

## ULTRALITE TEMPERED GLASS DIVISION

Tempered and heat strengthened glass, clear or coloured, custom fabricated if required, in thicknesses from 4mm (5/32") to 19mm (3/4").

Ultralite Tempered Glass is manufactured using advanced processing and handling equipment and is tempered by a computerized, tong-free furnace. The result is maximum flatness and the highest quality of finish available.

Sandblasting, Engraving and Painting – Special lettering, logos, crests or designs can be incorporated on tempered glass to enhance the personal touch of doors, glass, push and pull hardware, or sidelites.

300 Series custom doors
