- Gym / Equipment Rooms
- Stairs
- Benches

Duradek™

Company Story

Since 1974, Duradek® has been supplying North America's premier sheet vinyl pedestrian traffic membrane. Along with other PVC products, such as siding, windows and industrial roofing, Duradek® vinyl has gained wide acceptance in the construction industry as the ultimate in maintenance-free outdoor flooring.

Duradek®'s factory engineered products and professional, detailed installation techniques have set new standards for waterproofing that works.

All Duradek® membranes are reinforced for multi-directional strength and stability, and have a textured finish for slip-resistance. To increase performance, the vinyl makeup includes mildew inhibitors along with ultra-violet and heat stabilizers. Attractive patterns, colors and textures provide a contemporary new look, previously unavailable in the outdoor waterproof flooring market.

Duradek® is continually researching, developing & testing new products and application techniques.

Product Story

Duradek®, The ORIGINAL sheet vinyl membrane system for waterproofing decks and balconies, was developed to solve leak problems over 35 years ago.

How Duradek® is Better

- Duradek® is a pre-manufactured sheet, installed in one step — ready for immediate use. It can even be walked on during the installation process, meaning fewer tenant disruptions and vacancies.
- Duradek® can be successfully installed in any weather condition.
- Duradek® is glued to almost any surface, even over cracks, with minimal surface preparation.
- Duradek® requires no regular maintenance except cleaning.
- Duradek® can be purchased with varying degrees of non-slip surfaces.
- Duradek® is completely waterproof and attractive.
- Duradek® has a long life expectancy and can be re-coated in the future.
- Carpet can easily be installed over Duradek®.

Trained Installers

Duradek® offers ongoing classroom and video training to waterproofing contractors.

The Duradek® training is a combination of floor laying skills for appearance, and single-ply roofing skills for water tightness. Thorough knowledge of adhesives, sealants, coatings, carpentry, and concrete restoration work are common traits of a Duradek® contractor.

All necessary components of the finished waterproof system are available from Duradek®. This includes the adhesives, sealants, drains, scuppers and perimeter fastening devices.

All Duradek® products, when applied by an authorized Duradek® contractor, are covered by written warranties. Terms are dependant upon product thickness.

Duradek Permanently Waterproofs Decks and Balconies Better Than Any of the Alternatives

Commercial Waterproofing Solutions

The Duradek® System consists of a number of different types of sheet vinyl products, designed individually for many end uses.

Duradek®, a textured PVC, is laminated to a polyester reinforced fabric for additional strength. Available in an assortment of widths, thicknesses and textures, Duradek® vinyl membranes offer a wide range of waterproofing solutions in both residential and commercial construction.

Heavy duty, vinyl membranes are perfect for use on roofdecks and balconies.

Constructed of 60 mils of PVC resin, Duradek® Ultra is capable of accepting heavy pedestrian traffic & extreme heat and ultra-violet conditions. It is also fire-retardant and resistant to most chemicals.

Residential Waterproofing Solutions

The Duradek® System is unique in its assortment of widths, thicknesses, patterns, colors and textures.

Duradek®'s rough textured materials offer excellent slip-resistance for safe footing on ramps and stairs. The smoother textures offer easy-to-care-for surfaces.

Lighter weight Duradek® vinyls offer cost-conscious solutions for deck & balcony surfaces not exposed to heavy traffic or extreme conditions. For roofdecks or surfaces requiring maximum protection, heavy-duty (Ultra) sheet flooring is ideal.

New contemporary colors, textures and patterns offer the potential for complimentary or contrasting borders, and even custom design work.

Duradek® vinyl surfaces also work very well for interior applications. Indoor pooldecks, hot tub areas, and even garage floors are enhanced by Duradek®'s waterproof, easy to clean surfaces.

Powder Coated Aluminum Railing System

Engineered to Last

Durarail™ is engineered tough!

Durarail™ recognizes the importance of “structural integrity” when choosing a rail system. Durarail™ railing systems meet the most current building codes and are engineered and designed to exceed the most stringent requirements like hurricane force winds and extreme heat and cold.

Our powdercoat finish with no VOC is a perfect compliment for a truly “green” and “environmentally” friendly finish, over 200 varieties of colors and finishes available to enhance the look of your building.

Durarail™ – the railing that not only looks good but is designed to last.

Any one of 180 custom colors can be produced to match any exterior design features.

Durarail meets the International Building Code (IBC) 2006 in the USA
