Business is better with Bosch

Contract Sales 2008

BOSCH
Invented for life

Bosch builds **profits.**

Customize. Bosch appliances offer incredible design flexibility so you can build your profits by creating unique custom configurations to suit the homebuyer's lifestyle. Whether customers demand greater storage capacity or eco-friendly appliances, Bosch helps build your reputation through customization and quality.

Engineered for Value. Bosch premium appliances were engineered for quality, longevity and overall builder cost savings. They are simple to install, easy to move, and offer features that prevent or mitigate costly builder issues. Save money while building value with Bosch.

Build Satisfaction. Homeowners will receive years of faithful service and satisfaction from the Bosch appliances you install. Engineered for quietness, performance and efficiency, Bosch products reflect your attention to detail and your reputation for quality craftsmanship.

Increased Profitability. Make your projects stand out and increase their value by outfitting them with the complete suite of Bosch premium appliances. Boasting contemporary European design and American-built quality, functional is now beautiful.

Convenience. We've engineered our appliances for easy movement and installation into standard-sized cutouts. Plus, Bosch premium appliances allow you to get the complete line of kitchen and laundry appliances from a single vendor, which makes your job easier.

The Green Resource Center

www.boschappliances.com/greenbuilding

Bosch created this web tool to address builders' and architects' specific green building needs. Here is a quick overview of the helpful tools you will find there:

Green Building Rating Systems

See how Bosch appliances help you earn maximum credits in local and national Green Building Programs, like LEED®, Built Green® Colorado, Florida Green Building Coalition and many others.

Energy Savings Calculator

This helpful tool is an industry first. It outlines your dollar savings potential (cost of operation), by comparing Bosch appliances against the market average. This will help you trade up your clients to a Bosch premium appliances package, because you can now illustrate that the initial premium is offset by lower cost of operation.

Rebate Finder

Take advantage of the Rebate Finder that helps you find ENERGY STAR® rebates in your ZIP code, offered by your local utility and Bosch. Having this information at your fingertips can save you thousands of dollars.

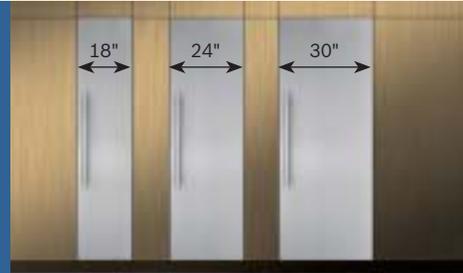

Cool and **customizable.**

Bosch Integra® Refrigeration introduces a new level of customization and design flexibility. They come in individual refrigeration and freezer units as well as bottom-freezers, wine coolers and French door configurations in various sizes that can be combined to give families appropriate refrigeration capacity. Special features include **OPTIFLEX™** heavy-duty hinges capable of supporting door-front paneling, a convenient water dispensing system, and our **ANTISTICK™** ice system.

Custom Configuration

With Bosch Integra Refrigeration, you can customize a cooling configuration that's perfect for homebuyers seeking a unique, semi-custom kitchen arrangement. From extra storage to space savings, Integra is the ideal refrigeration solution.

OPTIFLEX Hinge

With a maximum weight capacity of 220 pounds, the **OPTIFLEX** hinge lets you add heavy door paneling to coordinate with the rest of the kitchen. Plus, doors can be flipped to open in the opposite direction and mount perfectly flush to the cabinetry.

Easy Installation

Door panels are fully height adjustable while on the unit. All four legs are also height adjustable from the front and feature rollers for easy movement. Plus, the specially designed hinges protect cabinets from nicks when the refrigerator door is opened.

Fresh features that **sell.**

11 31 00/BOS
BuyLine 5978

We build refrigerators with the features homebuyers look for. Like our revolutionary Integra® Refrigeration, which offers dual evaporators to prevent odor transfer. Or our Bosch Evolution™ refrigerators, which offer external ice and water dispensers for the ultimate in convenience. And all Bosch refrigerators are ENERGY STAR® qualified for superior energy efficiency.

Freshness

The Integra's revolutionary MARKETFRESH™ food preservation system and the Evolution's Temperature Controlled Drawer and Multi-flow Shower Cooling System help keep all of your food at the peak of freshness and flavor.

Energy Efficient

Every Bosch Refrigerator is ENERGY STAR® qualified. With efficient features such as an alarm indicating the door is ajar, Vacation Mode and Economy Mode, Bosch can significantly reduce energy bills.

Quiet

Evolution and Integra Refrigeration units are engineered to deliver quiet operation with maximum performance. So families can cook, eat and entertain in the kitchen.

BOSCH
Invented for life

Build on our **innovation.**

Induction is a revolutionary new way of cooking that uses the power of electromagnetic waves to safely heat food quickly and efficiently. Amazingly, the cooktop remains lukewarm to the touch during the heating process because electromagnetic waves turn the bottom of the pot into the active heating surface, rather than the cooktop. This helps them to be safer than gas or electric cooktops, use 30% less energy, and heat food over two times faster than conventional ceramic cooktops.

Efficiency

Since Bosch induction cooktops operate using electromagnetic fields, the heat is actually generated by the cookware, preventing residual heat loss. Heating stops when the cookware is removed. This results in up to 30% less energy usage than conventional ceramic cooktops.

Safety

CHILDLOCK prevents accidental activation and **POTSENSE™** turns off the cooktop when cookware is removed. Sensors in the glass can detect large spills or excessive overflow, automatically shut off the cooktop, and sound an alarm to alert you of the situation.

Easy to Clean

Since heat is not radiated from the cooktop, baked-on food is a thing of the past. Plus, sensors in the glass stop cooking in the event of a large spill, and the smooth glass surface wipes clean with just a damp cloth.

Bosch ranges offer the top-tier cooking performance, innovative features and stylish design that homebuyers look for when shopping for a home or upgrading an existing kitchen. With features like Genuine European Convection, easy-to-clean surfaces, optimized burner spacing and class-leading oven capacity, Bosch ranges give customers all of the performance and functionality they expect from today's kitchen.

Genuine European Convection Oven with ACS

Our Advanced Circulation System (ACS) utilizes 8 vents to optimize the circulation of heated air for more even cooking and baking. By improving heat circulation in the oven cavity, this system also reduces cooking time by up to 25%.

Largest Capacity Oven

At 4.6 cubic feet, our oven is the largest in the slide-in category. Incredibly accommodating, not only can homebuyers cook many items for the whole family simultaneously, they can do so without flavor transfer.

Attention to Detail

Impress prospective homebuyers with your attention to detail when choosing appliances. Bosch ranges feature built-in warming drawers that come standard, as well as a hidden baking element that maximizes oven capacity while simplifying clean up.

BOSCH
Invented for life

Build Bosch **quality** into every project.

Today's homebuyers want high-quality ovens that will give them years of satisfying performance. Featuring the most durable materials, flush-to-cabinet design and details like recessed heating elements and halogen lighting, Bosch built-in ovens meet and exceed your customers' expectations. And since every oven is 100% quality tested before shipping, you know that your reputation for quality workmanship will be upheld.

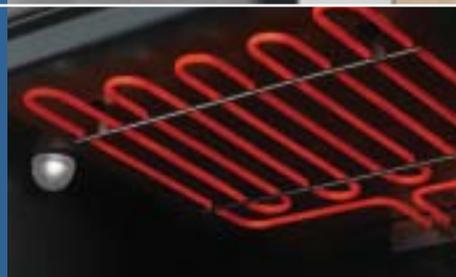

Flush-to-Cabinet Design

Bosch wall ovens are designed to mount flush to cabinetry for the sophisticated, built-in look that today's homebuyers desire.

Recessed Heating Element

A recessed top heating element and a fully concealed bottom heating element allow for greater interior capacity, unprecedented safety when removing dishes, and extremely easy cleaning.

Innovative Halogen Lighting

Both beautiful and functional, an interior halogen lighting system floods the oven cavity with extra-bright light for easy viewing.

Capacity customers want.

11 31 00/BOS
BuyLine 5978

Bosch ovens do more than bring functional beauty into your kitchens. They increase the value of your projects by delivering industry-leading capacity. And thanks to features like a large viewing window, the fastest self-clean cycle and Genuine European Convection, they're the optimal choice for your homebuyers' families. They can be mounted in-cabinet or under the counter for optimum versatility, so they're the ideal choice for you, too.

Largest on the Market

Our ovens boast the largest capacity on the market, enough to cook an entire meal at once. They also feature an expansive viewing window to monitor the progress of meals.

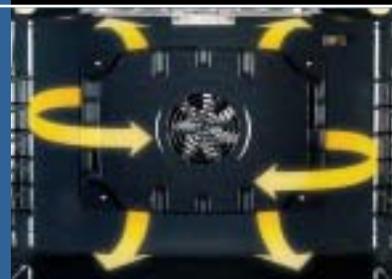

ECOCLEAN™ Self-Clean Cycle

Our built-in ovens' 2-hour self-clean cycle, the industry's best, is safer, more convenient, and allows homeowners to use their time in the kitchen for cooking instead of cleaning.

Genuine European Convection

Discerning homebuyers will appreciate the performance of an oven with Genuine European Convection. This feature has a powerful ring heating element around the convection fan. It improves airflow for more even cooking results.

Profitable **performance.**

A Bosch cooktop tells homebuyers that you are serious about kitchen performance and aesthetics. Whether gas or electric, Bosch cooktops combine stylish looks with innovative features and outstanding cooking performance that bring a new level of European sophistication into the heart of the American kitchen. Available in widths of 30" and 36," Bosch gas and electric cooktops offer customers an unrivalled combination of power and convenience.

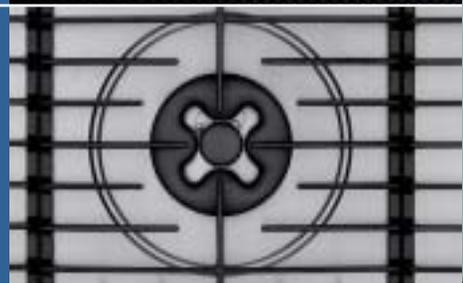

Touch Control

This touch-sensitive control gives a digital readout of the chosen power setting as well as a residual heat indicator to prevent accidental injury to homeowners or their children. Also includes a built-in timer for added convenience.

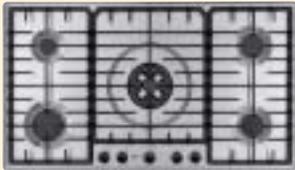

TRIPLEFLAME™ Burner

Homebuyers look for exceptional engineering details such as the TRIPLEFLAME Burner. The three flame ports in this burner create an even flame pattern across multiple pan sizes and in multiple cooking modes.

Easy to install, and even easier to sell to homebuyers, Bosch's ventilation systems are as efficient as they are quiet. With their powerful dual-inlet blowers, they do more than evacuate steam, smoke and odors—they improve indoor air quality to add an even greater measure of safety to your projects. And with a variety of hoods available, from our new flush-fitting custom inset hoods that are barely visible to our aesthetically pleasing island hoods, you have the most design flexibility possible.

Improve Indoor Air Quality

Ensure compliance with indoor air quality standards by installing Bosch ventilation systems. They are available with four-speed fans with a wide, adjustable CFM range as well as double blowers for optimal ventilation efficiency.

Barely Seen and Barely Heard

Our new inset hoods give you all the design flexibility your customers desire, and are whisper-quiet when operating.

Silencing the competition.

11 31 00/BOS
BuyLine 5978

Bosch dishwashers offer the unique combination of nearly silent operation, **ECOSENSE™** technology that saves water and energy, and safety features that give homebuyers peace of mind. All wrapped up in a contemporary design that's as beautiful as it is practical. Plus, J.D. Power and Associates ranked Bosch "Highest in Customer Satisfaction with Dishwashers." This may be just one more reason why Bosch is quickly becoming America's favorite appliance brand.

AQUASTOP®

AQUASTOP leak protection helps prevent costly builder issues such as household mold associated with leaks. It does this by monitoring water levels, automatically shutting down in the unlikely event of a leak, and containing water before it reaches the floor.

Silence

Bosch dishwashers are the quietest available. With a suspended two-pump motor system, heavy-duty bitumen, and cotton-fiber sheet insulation, vibrations and noise are virtually eliminated.

Bosch received the highest numerical score with Dishwashers in the proprietary J.D. Power and Associates 2006 Major Home Appliance Study.™ Study based on 12,656 total responses measuring 11 brands and measures opinions of consumers during the previous 24 months. Proprietary study results are based on experiences and perceptions of consumers surveyed in July and September 2006. Your experiences may vary. Visit jdpower.com.

BOSCH
Invented for life

The laundry pair that sets the bar **higher.**

Bosch offers the most efficient laundry pair on the market, thanks to features like **ECOSENSOR™** which lowers energy and water consumption by up to 20%. And now, Bosch introduces the 800 Series and 500 Plus laundry machines to the premium line up, which offer you an even greater degree of choice when seeking laundry machines with category-leading quietness and clothing care tailored to meet your customers' needs.

Unrivalled Quietness

Introducing a breakthrough in quietness. Bosch has developed technology that dramatically reduces sound output, so you can install the quietest laundry pair on the market into your homes. This highly desirable feature is a great selling point for your projects.

Most Efficient Laundry Pair in the U.S.

Bosch dryers feature **ECOSENSOR**, a system that delivers precise drying results that are gentle on fabrics by adapting to varying moisture levels. When paired with our energy and water-saving washers, our laundry systems deliver efficiency matched only by their quiet performance.

Stackable Installation

Because they can be stacked, Bosch **Axxis®** laundry machines provide up to a 3.81 cubic foot drum while using minimal floor space. This also allows them to fit easily into convenient places like bedroom-adjacent closets, eliminating the chore of carrying heavy laundry to a far-away laundry room.

No Ducting Required

The **Axxis** condensation dryer does not require ducting or a blower to vent hot air, savings hundreds in installation costs. The stackable **Axxis** laundry units also plug into each other, eliminating the need for a second outlet.

Bosch **Nexxt®** Washers and Dryers are backed by the Good Housekeeping Seal of Approval — a two-year limited warranty.

For immediate installation dimensions by fax, use your handset and call 1.775.833.3600. Use code #8317 for a directory of Bosch products. Visit www.boschappliances.com, www.sweets.com or call 1.800.944.2904 for a complete list of products, dimensions and up-to-date information.
