Rakks "E" Standards
Information & Installation

Strip of Wood

3/4"

2" x 4"
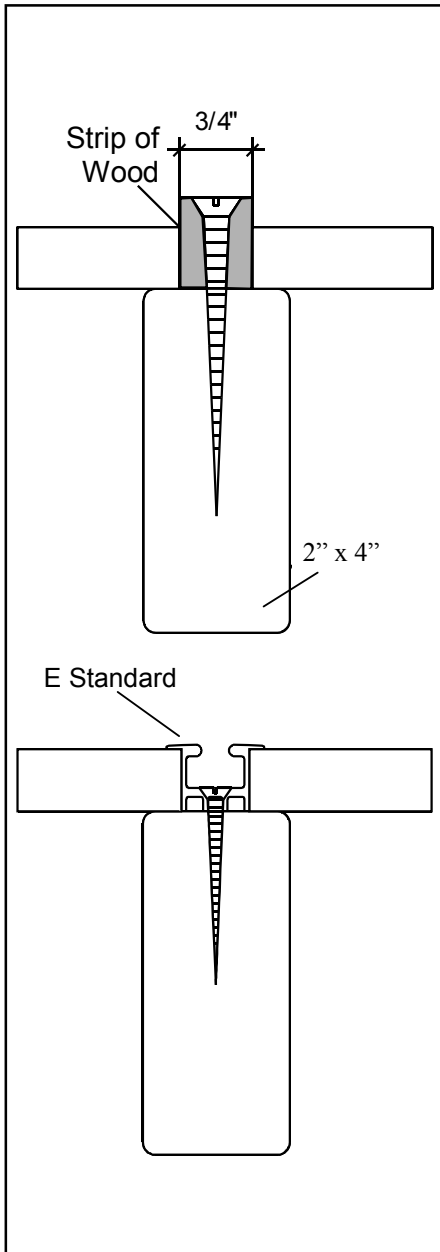

E Standard

Rakks "E" Standards are designed to be flush mounted on the wall protruding a mere 1/8" from the wall surface. **NOTE:** *All standards should be mounted directly on studs or blocking.*

1. Determine where the standards are supposed to be placed.

2. Tack a strip of wood, exactly 3/4" wide, plumb, on the desired location.

3. Sheet rock right up to the edge of the strip. ***DO NOT JOINT COMPOUND BETWEEN THE WOOD STRIP AND THE SHEET ROCK.***

4. Remove the wood strip and screw the "E" Standard in its place using the screws provided.
