MarbleTex™ Synthetic Stone Balustrades

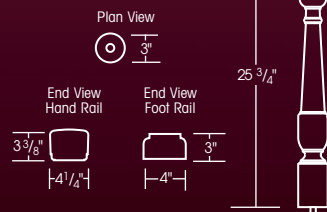

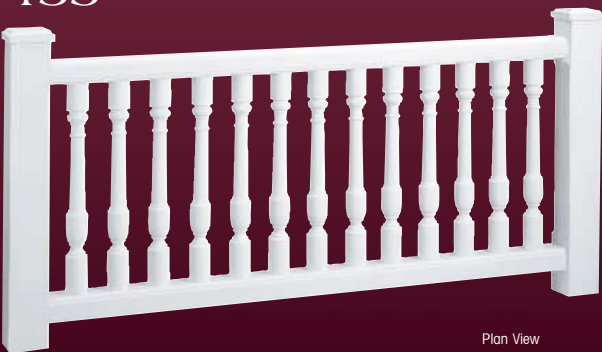

410

445

435

Throughout history, balustrades have enhanced the beauty and character of fine architecture. In engineering **MarbleTex™** balustrades, Melton Classics has combined state-of-the-art technology with a patented manufacturing process to produce classic balustrade designs that provide the rich detailing and substantial feel of marble with reduced weight. MarbleTex balustrades also have integral coloration that needs no painting or sealants. Melton Classics also offers maintenance free columns for complete coordination of your design elements.

MarbleTex™ Balustrades Provide These Features:

- Structural integrity of stone without the excessive weight. Ideal for balconies, widow's walks, or other rooftop applications, as well as, stairways, pool enclosures, decks, gazebos, courtyards and patios.
- Integral coloration requires no painting.
- More consistent surface texture than stone or concrete.
- Water absorption is .001 so sealants are not recommended and spalling is eliminated.
- Simple and inexpensive to install without specialized labor.
- Available in integrally colored Classic White synthetic stone, or premium colors such as Limestone, Sandstone and Buff, are available for an additional charge.
- Custom baluster designs, radius railings and radius stairs are available upon request.
- Railings are available in one foot increments up to 20 feet.

MarbleTex™ Synthetic Stone Columns

Maintenance free MarbleTex™ columns are roto-cast from our exclusive integrally colored synthetic stone that requires no painting. The substantial look and feel of stone is achieved with MarbleTex™ balustrades and columns without excess weight making them ideal for elevated applications. MarbleTex™ products are available with a textured or smooth finish in our standard Classic White integral color, or premium colors such as Limestone, Buff, and Sandstone are offered for an additional charge. MarbleTex™ balustrades and columns are available in a wide array of sizes and classic styles to enhance any design or application. Call your Melton Classics architectural representative for more information.

Temple of Winds

Tuscan

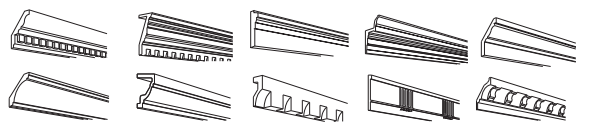

Architectural Urethane™ balustrades by Melton Classics are an ideal low maintenance alternative to wood balustrades. Although equally at home on the patio or porch, Architectural Urethane™ balustrades are one of our most popular balustrade systems for balconies and widow's walks where reduced weight and the feel, elegance and charm of painted wood is desired. Manufactured from a durable high density polymer and factory primed, Architectural Urethane™ will not rot, splinter or separate, and is insect resistant. Our large selection of state-of-the-art molds provide unmatched crispness of detail and superior quality you have come to expect from Melton Classics.

Classically designed Architectural Urethane™ balustrade systems are available in over 40 sizes and designs to enhance the beauty of any project. Architectural Urethane™ balustrades are BOCA and IBC compliant, and balusters are available at a custom height or to meet 36" or 42" rail height codes. In addition to our large inventory of standard designs, our artisans can also produce literally any existing pattern or custom design. Radius railings are also available.

Architectural Urethane™ Additional Products

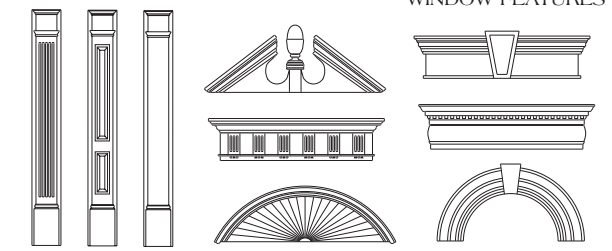

For complete coordination of your design elements, Melton Classics also offers Architectural Urethane™ mouldings, cornices, shutters, window heads, entrance features and a wide array of other low maintenance polymer architectural details.

MeltonStone™ Cast Stone Balustrades

MeltonStone™ cast stone balustrades provide the quality conscious designer with a cost effective alternative to natural stone. MeltonStone™ cast stone exhibits the same weighty presence and natural maturing characteristics of natural stone at a lower cost. Natural stone aggregates, sand and cementitious binders are mixed in exacting quantities to create the desired stone appearance. MeltonStone™ composite is hand cast utilizing our vibra-tamp dry casting method to produce improved density and surface quality to wet cast products. Also available in MeltonStone™ is a comprehensive selection of cast stone architectural elements to complement our balustrades.

VinylClassic™ PolyVinyl Balustrades

VinylClassic™ balustrade is the ideal product for those looking for the dramatic architectural appeal of a substantial classical balustrade on a tight budget. This durable balustrade system is crafted in virgin vinyl and reinforced with a heavy aluminum sub-structure to meet BOCA and IBC structural building codes, and is backed by a lifetime warranty. This maintenance free balustrade system is also simple to install, and does not require painting. If your project calls for an affordably-priced, classically designed balustrade that's maintenance free... specify VinylClassic™ balustrade.

ClassicRail™ PolyVinyl Railing Systems

Enduring beauty is now available with our line of economically priced and maintenance free ClassicRail™ vinyl/aluminum and vinyl/composite railing systems. Our vinyl/aluminum railings exceed structural building codes and provide a solid feel. Our vinyl/composite railings have the feel and look of wood with a co-extruded vinyl exterior that never fades and never needs painting. ClassicRail™ railing systems are easily installed, backed by a lifetime warranty and are the affordable answer for all your railing needs.
