

Bird•B•Gone Mist

Installation Instructions

Mount control panel

- ▲ Choose best location based on proximity to power source, air compressor and accessibility
- ▲ Fasten unit securely to building using mounting brackets
- ▲ Plug in power cord to power supply
- ▲ Program system (see Programming System)

Mount misting unit drop station(s)

- ▲ Open door and unpack spray arm and nozzle
- ▲ Attach spray arm to misting unit using provided Allen wrench
 - Rubber washer should be between arm and enclosure
- ▲ Mount misting unit in desired location using mounting brackets
- ▲ Twist knobs on spray arm to loosen and adjust direction of nozzle to desired spray direction
- ▲ Hand tighten knobs once nozzle is in desired position
- ▲ Make sure nozzle is hand tightened as well
- ▲ Attach air and product tubes to female connections on top of misting unit
 - Product tube has stainless steel connection and goes into stainless steel connector,
 - air tube has plastic connection and goes into plastic connector
- ▲ Remove cap from repellent and replace with enclosed cap with intake tube
- ▲ Place repellent in misting unit and connect to intake connector
- ▲ Add additional units the same way, as necessary

Connecting the system

- ▲ Attach network cable from female connection on right side of control unit to male connection on left side of misting unit
 - If more than 50' of cable is needed, attach extra cable to female end using connector sleeve that is provided
 - To add more misting units branching off in a different direction, a network cable "T" connector can be used in the same manner
 - For additional misting units, the network cable is attached the same way
- ▲ Attach 1/4" tubing with male connections from female outlet on right side of control unit to female inlet on left side of misting unit
 - If more than 50' of 1/4" tubing is needed, attach extra 50' of 1/4" tubing to optional female end coupling
 - To add more misting units branching off in a different direction, a 1/4" tubing "T" connector can be used in the same manner
 - For misting unit to misting unit, air tubing connection is done the same way
