**METALWORKS™** 2' x 2' Flush Tegular  
Microperforated in Silver Grey  
Morgan State University Library, Baltimore, MD  
Sasaki Associates, Inc, Boston, MA

## WOODWORKS®

### Standard

- Tegular
- Vector
- Linear
- Coordinating WoodWorks Trim for Clouds

### Real Wood Veneers (available perforated or unperforated)

- **Bamboo** – vertically grained panels with all the inherent characteristics of natural bamboo. A rapidly renewable resource, bamboo is a sustainable and natural way to help contribute to LEED credits (MRC6) – Patina or Native veneers
- **Natural Variations™** – natural graining, with all the variations found in nature. No two are alike! Maple, Beech, Light Cherry or Dark Cherry
- **Constants™** – engineered to create a uniform, consistent look. No surprise knotholes or rings! Maple, Cherry or Walnut

For more stringent budget requirements, EFFECTS™ Wood Looks, an authentic wood grain image, is available on MetalWorks Vector, Tegular and Linear panels

### Premium Options

Additional wood veneer or size options available on a special-order basis.

### Custom Systems (available in standard or custom veneers)

- Access
- Plank and Curved

## Collaborative Project Support

Armstrong provides collaborative support for the design of ceiling and wall projects that move from traditional to unique one-of-a-kind design solutions. Whether in wood, metal, accent canopies, acoustical canopies or a combination of materials, we tailor specific capabilities to your applications.

Our architectural specialties project management team:

- Is experienced in architecture and engineering
- Will work with you on custom ceiling and wall designs
- Has a broad portfolio of product capabilities

Our project management team and broad range of manufacturing capabilities offer you the support needed to bring your vision into reality. Call 1 877 ARMSTRONG (Architectural Specialties) and use prompts 1-1-4 for assistance with custom systems.

# Acoustical & Decorative Wall Systems

**SOUNDSOAK** Acoustical Wall System  
Armstrong World Industries, Lancaster, PA

**WOODWORKS** and Ekos Acoustical Wall System with Chair Rails  
Armstrong World Industries, Lancaster, PA

## SOUNDSOAK® Acoustical Walls

- Available in a wide range of sizes, including custom 4' wide panels
- Effectively control unwanted noise and minimize sound transmission from space to space for increased speech privacy
- Features an acoustical inner core (either mineral fiber or fiberglass) covered with a choice of woven fabric, composed fabric or easy-care vinyl
- new** • Chair Rail accessories – available in a variety of finishes to provide more design options
- Acoustical panels absorb 50% to 90% of the sound striking the surface – 3 to 6 times the sound absorption of fabric-covered gypsum board
- new** • Low and no-added formaldehyde options available

Search: **soundsoak**

## WOODWORKS® Ekos™ Wall Systems

### Standard

- Choice of four warm wood finishes with distinctive graining and tone variations
- Available unperforated or perforated with an acoustical substrate for enhanced acoustical performance.
- Can help contribute to LEED® Credits with no-added-formaldehyde and high recycled content
- Lightweight and environmentally-friendly real wood veneer panels for a lower cost than custom millwork
- new** • Wide variety of decorative wood and metal accessories, including chair rails
- Edge-banded real wood veneer panels
- Choice of three standard panel sizes – 8', 9' or 10' high by 24" wide

### Custom

- Variety of wood species, stains, and perforation options available
- Can coordinate design with WoodWorks Custom Ceilings
