soundsoak

soak up the unwanted sound

> Soundsoak® acoustical wall panels absorb 50% to 90% of the sound striking the surface – 3 to 6 times the sound absorption of fabric-covered gypsum board

> Minimize sound transmission from space to space for increased speech privacy

> A variety of standard fabrics available on both mineral fiber and fiberglass cores

> Incorporate fabric from the most popular textile companies for one-of-a-kind looks

Featured Products
1. Soundsoak® 85 Acoustical Walls in Bone – University of Rhode Island, Kingston, RI
2. MetalWorks™ Radial custom system with RH200 panels in Silver Grey, SoundScapes® Shapes Acoustical Cloud circle panels in Pale Lemon, and custom Soundsoak® Acoustical Walls – Pharmaceutical Research Institute, Andover, MA
3. Custom Soundsoak Acoustical Walls – Pharmaceutical Research Institute, Andover, MA

armstrong.com/soundsoak
reducing noise

Study after study shows unwanted noise as the major cause of reduced employee effectiveness, high stress, and declining job satisfaction. The problem is loud and clear when you realize that 98% of the noise striking a hard wall surface (such as drywall) bounces back into the room creating reverberations that disturb, disrupt, and distract.

And there’s no need to choose between performance and design. You can increase your design flexibility with made-to-order panels. Choose a size, thickness, edge detail, and fabric for your project. Fabric panels can even be printed with custom images. Fabric-wrapped corners, impact-resistant panels, and curved panels can be tailored to specific project needs.
above all

WoodWorks® wall panels allow you to easily coordinate your ceilings with your walls.

> A variety of standard wood species, finishes, panel and perforation sizes provide the perfect combination of sound quality and beauty

> If your project requires a different or unique wood species, finish, or perforation, our Architectural Specialties team can help make your design become a reality

> All panels available with perforated or unperforated veneers
WoodWorks™ Ekos® wall systems are a unique pairing of a real wood veneer with an acoustical substrate that yields a lightweight and environmentally friendly product.

> A wide variety of decorative wood and metal accessories ensure a complete, finished look

> No-added formaldehyde and no detectable formaldehyde emissions

> The virtually invisible veneer perforations and acoustical mineral fiber substrate absorb 45% of sound striking the surface

**Featured Products**

1. WoodWorks® Vector® Wall panels in Natural Variations® Light Cherry – The University of Memphis, Elma Roane Fieldhouse, Memphis, TN

2. WoodWorks™ Ekos® Wall System in Maple with aluminum trim – Armstrong Avenue, Lancaster, PA

3. Serpentina® Classic panels with S500 perforation in Silver Satin, WoodWorks Ekos perforated panels in Mahogany with Natural Anodized reveal trim – M&I Bank, Tampa, FL

wall panels

it's up to you

Define the look of your space, by creating a one-of-a-kind visual with standard products, using translucent wall panels.

> Aluminum Point Support Kit offers a contemporary, sleek visual

> Linens, tone-on-tone, and bold, solid colors are just some of the design choices

> Colors integrate across families – mix and match with accent canopies and lay-in panels in the Infusions® family as well as acoustical clouds and canopies in the SoundScapes® family
scatter the noise

Diffuser accessories for ceilings and walls blend sound for improved acoustics.

> Available in White gelcoat and 22 fabric finishes
> Easy to install
> Barrel or pyramid designs in a variety of sizes

diffusers
beyond the norm

Create a continuous, sophisticated look with enhanced acoustics, using WoodWorks® Channeled planks. Choose Natural Variations™ real wood veneers for a true wood visual that's environmentally friendly, or our Images™ finishes for projects on a budget.

Featured Products
1-2 WoodWorks® Channeled Wall System with W7 Perforation in Natural Variations™
Light Cherry – Franklin and Marshall College, Lancaster, PA

**Notes:**
- When specifying or ordering, include the appropriate three-letter color suffix (e.g., 5855 N M P): NV Maple (NMP), NV Light Cherry (NLC), NV Dark Cherry (NDC)
- ** When specifying or ordering, include the appropriate length suffix (if applicable) and the appropriate two- or three-letter color suffix (e.g., 5859 N M P).

There are other standard sizes and perforations to choose from in a variety of finishes. Custom options are also available.
**WoodWorks Linear walls provide a modern look and give any space a more open feel. It takes traditional to a new level.**

**Nominal 4-1/2" module also available**

*When specifying or ordering, please include the appropriate three-letter color suffix (e.g., 6460W1 NV M P); NV Beech (NBE), NV Maple (NMP), NV Light Cherry (NLC), NV Dark Cherry (NDC)*

**Adding acoustical infill (item 8200100, 5479, or 5823) for 4-1/2" module increases the NRC to 0.60. Adding acoustical fiberglass infill for 6" module increases the NRC to 0.45; adding BioAcoustic infill 5479 increases the NRC to 0.50. For additional infill options, refer to the Acoustical Infill Panels catalog pages 133-134, or visit armstrong.com/woodworks**

**Notation for Radiused Applications:** For radiused applications, use standard panels and HD Linear Carriers faceted 12" on center with RC2BL clips.

**For additional accessories, see catalog pages 135-136, or visit armstrong.com/woodworks**
