

Manufacturer of architectural and commercial grade windows, curtain walls, entrances, and storefronts

CURTAIN WALL

EFCO manufactures a comprehensive line of curtain wall systems. These systems are available in a variety of system depths, profiles and finishes. There are systems for applications ranging from fully captured, structural silicone glazed or silicone gasket. EFCO curtain wall systems are designed to meet the most demanding criteria. Systems are tested for air, water, structural, thermal, impact, blast and ballistic performance. EFCO curtain wall systems provide the highest level of performance and value.

LEED CERTIFICATION. LEADING ROLE.

A concept that ripples through a project at every stage, at every level, in every direction, creating a fully integrated environmental commitment. It's known as LEED—"Leadership in Energy and Environmental Design"—a points-based certification program created by the U.S. Green Building Council promoting preservation and conservation of materials, resources and energy, the use of recycled materials, the indoor environmental quality of occupied space, and site planning. EFCO offers a wide variety of high performance products including building integrated photovoltaics (BIPV). This host of products can help your project qualify as a fully integrated, environmentally conscious, LEED certified, GREEN building. Contact your local EFCO Sales Representative today to see how you can partner with EFCO for your next GREEN project. 1.800.221.4169
