ANY CRITICAL ELEVATOR EVENT IS IMMEDIATELY FORWARDED TO YOUR LOCAL OFFICE AND THE APPROPRIATE ACTION WILL BE TAKEN.

ThyssenKrupp Elevator
Americas Business Unit

Technology makes it possible.
Commitment makes it work.
Introducing VISTA Remote Monitoring from ThyssenKrupp Elevator.

It makes the call, reports the trouble and schedules the service—so you don’t have to.

If you’re like most building owners and managers, you have enough to worry about without an elevator service issue interrupting your busy day.

Available exclusively from ThyssenKrupp Elevator, VISTA Remote Monitoring is an innovative service feature for control systems that monitors the performance of your elevators around the clock, every second of every day. If something out of the ordinary occurs, or if the elevator isn’t performing up to optimum standards, VISTA Remote Monitoring will alert the local ThyssenKrupp Elevator office. The service technician may then be dispatched, often before you even realize there is a problem.

It’s important to remember that VISTA Remote Monitoring is not a substitute for hands-on service, it’s a supplement. One that will allow us to make seamless adjustments and repairs without involving so much of your valuable time.

Perhaps the only time you think about your elevators is when a service issue arises. Now, if you like, you don’t have to think about your elevators at all. For a more comprehensive review of VISTA Remote Monitoring, call your local ThyssenKrupp Elevator representative today. Or visit our website at: thyssenkruppelevator.com.
