RESHAPING WHAT AMERICA PLAYS ON

SUPERIOR PRODUCTS AND THE INDUSTRY'S LONGEST WARRANTIES

Every Surface America and A-Turf product is designed and manufactured for long-term performance. We select the best material components available and design each surface with the characteristics necessary for the application.

SYSTEM TYPES FOR ALL APPLICATIONS

SURFACE AMERICA: Mixed and poured on-site systems allow for the ultimate in customization – from specifications to surface designs. Roll goods that are produced with the world's best technology – resulting in consistent thickness and uniformity. Factory-molded tiles formulated for the ultimate in durability. Multi-component systems that combine outstanding attributes and flexibility.

A-TURF: Several polyethylene fiber types. Rubber-only, sand-only or rubber & sand infilled systems. Other infill types available. Non-infilled systems for sports and non-athletic applications.

Our playground products are IPEMA certified.

To verify product certification visit www.ipema.org

PROMOTING PRODUCT SUSTAINABILITY

North America's Largest Processor And User Of Recycled Tire Rubber
As part of the ECORE™ International group, we recycle 80 million pounds of scrap tire rubber each year, helping conserve more than one million barrels of oil in the process to convert pliable treads to durable products.

The Widest Collection Of Recycled Materials

Surface America and A-Turf incorporate the widest collection of recycled materials into their surfacing systems, utilizing both post-consumer and post-industrial recycled material components. Most of the recycled material is rubber from post-consumer tires.

Our products are eligible for LEED® credits.

Playground Surfacing

Surface America features the most complete line of playground surfacing systems in the world. Featuring surfacing that remains in place at the most critical areas, and providing consistent shock absorption – with no maintenance. IPEMA certified and eligible for LEED® credits.

POURED

PlayBound™ Poured-in-Place • EverTop™

TILE

UltraTile™ • PlayBound™ Tile

TURF

PlayBound™ TurfTop™ with Infill
