Sample Boards & Rotating Carousel Rack

Krukowski Stone Company, Inc is a major manufacturer of natural stone thin veneers and one of the first quarriers to produce a thin veneer product. Our natural stone thin veneers are produced from our full veneer material, yet use 75% less stone than our full veneer products while maintaining the same natural surface appearance.

Our thin veneer depths vary from 3/4" to 1-1/2" and vary in weight from 9 to 15 pounds per square foot. Thin veneers not only dramatically reduce materials but also significantly reduce installation, shipping and construction costs. When installed it is difficult to determine if the project is a full depth or a thin veneer material.

**New in 2011** - Our new thin veneer stone cutting equipment allows us to produce larger area pieces. The area per piece can now exceed 15" in height and 20" in diameter. We now pre-blend the thin veneer blends. This will be done at the time of your order, please plan ample lead time.

\*PLEASE NOTE: Aqua Blue Boulder may exceed 15 pounds per square foot in a few of the pieces where the face has a more convex protrusion.

**LIMESTONE** Natural Stone Thin Veneers **NEW!**

**PACKAGING** Available in three convenient categories

**Handy Packs**

5 square feet of flats or  
10 lineal feet of corners\*.

\*PLEASE NOTE: WI Granite Cobbles, WI Split Fieldstone, Wausau Red, and all products that have sawn heights of 7½" and 7¾" are packaged 8 lineal feet per handy pack instead of 10 lineal feet because of their larger size.

**Handy Packs By The Pallet (1)**

40 Handy Packs of flats per pallet  
24 Handy Packs of corners per pallet

NOTE: Longest length for pieces packaged in Handy Packs is 22"

**Thin Veneer Crates (2)**

100 square feet of flats or 100  
lineal feet of corners.

**Full Pallets (flats only) (3)**

Contains approximately 257-280  
square feet of flats per pallet.

**APPROXIMATE WEIGHTS:** 40 HP-Flats weigh approximately 1,800-3,200 lbs. per pallet. 24 HP-Corners weigh approximately 1,800-3,000 lbs. per pallet. Approximately 44 Crates per full truckload. 100 Sq. Ft. Flat Crates weigh approximately 1,100-1,500 lbs. each. 100 Ln. Ft. Corner Crates weigh approximately 1,000-1,600 lbs. each. 257-280 Sq. Ft. Full pallets weigh between 3,000-4,200 lbs. each.

**ACCESSORY STONES**

Select from four stone types: Cambrian Cream, Carmel Cream, Silverdale or Indiana Limestone available in keystones, trimstones, hearthstones and sills which adds to the architectural detail of any project.

**Hearthstone.....18" x 18" x 1¼"**

Each piece (approx. 32 lbs.)

**Hearthstone Standard:** Texture applied to surface and 1 finished textured edge.

**Hearthstone Corner:** Texture applied to surface and 2 adjoining textured ends for corner application.

**Trim Stones.....6" x 8" x 1¼"**

Ten pieces (approx. 5 lbs. each) per box. Texture applied to surface.

**Sills.....24" x 2½" x 2¼"**

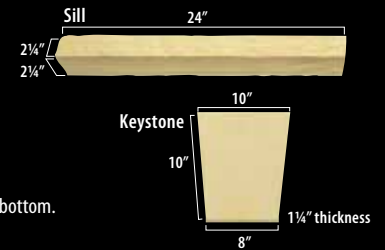

Four pieces (approx. 12 lbs. each) per box.

No texture on Sills surface, Rock-faced edge.

**Keystones.....10" x 8" x 1¼"**

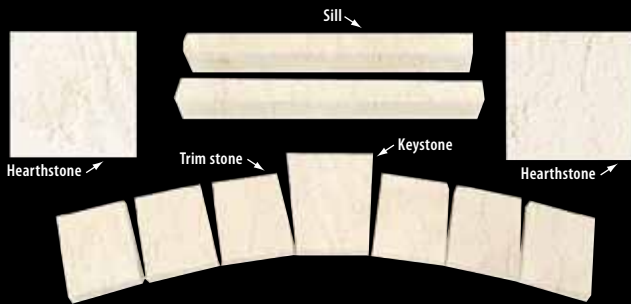

Each piece (approx. 8 lbs.)

Measures 10" at the top tapering to 8" at the bottom.  
Texture applied to surface.

**CAMBRIAN CREAM**

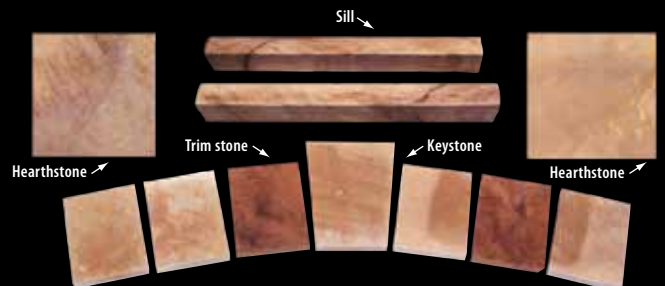

Light buff, may contain crimson and/or gray veining. Pieces will vary in color & veining.

**CARMEL CREAM\***

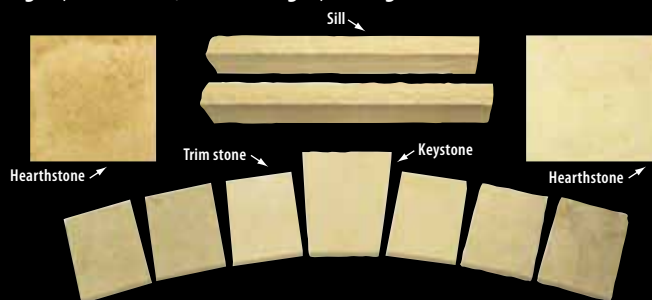

Extreme color variations from light buff, tan, burgundy or terracotta; contains light to excessive veining and swirls of dark brown, burgundy or rust.

\*This material can be very erratic in veining, colors will vary.

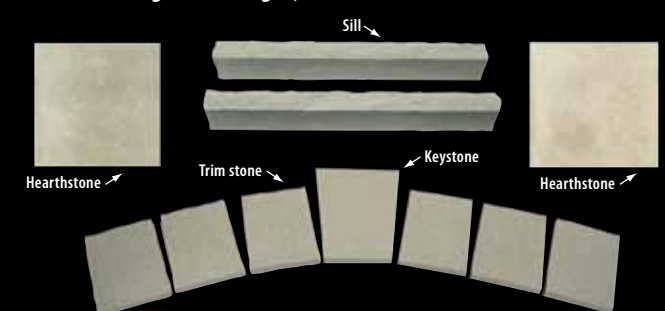

**SILVERDALE**

Light yellow - buff, with some gray veining.

**INDIANA LIMESTONE**

Variations of light to dark gray.

**You'll Discover We're  
SOLID As A ROCK.**

Note: Product is produced from natural stone - colors & thicknesses will vary. This holds especially true for Accessory Stones. Some accessory stones may be chipped at the back or at the bottom, this will not affect the appearance when mortared.
