

Modular Stainless and
Aluminum Railing Systems

Accomplish Your Creative Vision

Enhance your project with an unobstructed view using our modular railing systems. With clean lines and symmetry, these railing systems incorporate purpose, aesthetic appeal, and sophistication. Our timeless design displays striking features while offering choice and versatility.

Prominent Features:

Interchangeable components. Optional finishes. Glass versatility. Modular systems easily adapt to the rake of any stair. As we maintain many stock items, we can expedite delivery for standard designs and provide custom capabilities. **Architectural Railings & Grilles, Inc.** has the finest skilled craftsmen from design engineering through fabrication and installation.

Interchangeable Components:

Architectural Railings & Grilles, Inc. provides non-welded assemblies using machined parts and other collateral materials that are interchangeable within the railing system. Distinctive looks may include combining stainless and painted aluminum posts and fittings. Top cap selections range from stainless and aluminum to wood.

Finishes:

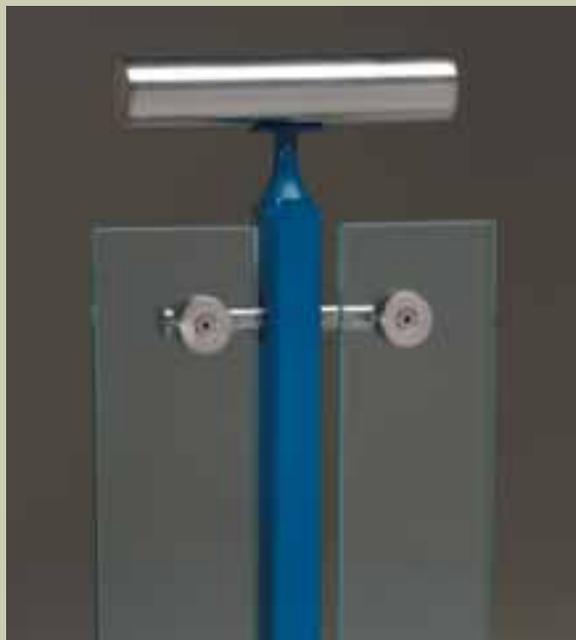

Stainless with #7 polish, an array of Kynar 500™ and powder coat colors, along with various anodized finishes are available.

Glass Options:

Architectural graphic glass providing color and custom patterns, tempered safety glass with exposed polished edges, clear and etched glass.

Custom Capabilities:

Our purpose is to accomplish your creative vision. **Architectural Railings & Grilles, Inc.** is known for exceeding expectations by offering exciting design opportunities and creative choices so that a seamless railing system is achieved.
