

Clutch + Tube Selection Guideline

1. **IN THE LEFT HALF OF THE CHART**, find the column appropriate for the shade's fabric. Read down that column until you reach the approximate height of the shade.
2. **FOLLOW STRAIGHT ACROSS** to the right half of the chart, as far as the vertical line that represents the shade's width.
3. **THE CLUTCH AND TUBE SIZES SHOWN ARE THE MINIMUM** you may use for that shade. You may, of course, use a heavier duty clutch or a larger tube. Using a lighter clutch than recommended might lead to clutch failure. Using a smaller tube might lead to bowing of the tube.
