DECORATIVE ARCHITECTURAL PRODUCTS

FIBERTECH

BENCHMARK COMMUNITY BANK Kenbridge, VA

TOWNE BANK GREENBRIER Chesapeake, Virginia

THE PORTALS, PHASE III Washington, DC

**Integral Color.
Authentic Detail.
Meticulous Service.**

That's just part of what makes Fibertech your number one source for FRP products.

UNITED STATES COURTHOUSE Covington, Kentucky

UNITED STATES COURTHOUSE

THE WOODLANDS AT FURMAN Greenville, South Carolina

School of Music Complex
at the North Carolina School of the Arts
ARCHITECT: Calloway, Johnson, Moore & West, PA

Fibertech Makes It Sing

This building's distinctive cylindrical vestibule called for sharp edges in some places, sweeping curves in others. The post, beam and trim are finished with a metallic surface. The top portions of the entryway columns are under cover, the lower parts exposed to weather.

On the cover:

BENCHMARK COMMUNITY BANK Kenbridge, VA
CLIENT: Danville Lumber & Manufacturing Co.

TOWNE BANK GREENBRIER Chesapeake, VA
ARCHITECT: HBA Architects Engineering Interior Design

THE WOODLANDS AT FURMAN Greenville, SC
ARCHITECT: Perkins & Will

UNITED STATES COURTHOUSE Covington, KY
ARCHITECT: Sherman • Carter • Barnhart

THE PORTALS, PHASE III Washington, DC
CLIENT: Manhattan-Prill Joint Venture

Fibertech Makes It Right

When the project calls for exact invention or precise restoration of detailed architectural components, look to Fibertech. The FRP components' durable gelcoat may be textured and pigmented to simulate virtually any material or molding effect—wood, cast stone, painted metal, or any other conventional building material. Fibertech molding methods allow even the most complex or unusual shapes to be produced precisely and economically.

Fibertech Makes It Happen

Fibertech works closely with each client to gain a thorough understanding of their specific project's design, technical requirements, and construction schedule. A comprehensive materials solution is proposed, then designed to meet the project's unique challenges. The result is superior architectural products custom-crafted to each project's specifications.

Fibertech Makes It Last

Fiberglass reinforced polyester (FRP) by Fibertech produces an enduring building material with an impressive strength-per-dollar price. FRP products do not rot or rust, absorb water, or become damaged by infestation. Unlike painted materials, the surface layer of Fibertech's polyester gelcoat will not flake or peel. As well, UV stabilizers prevent fading and deterioration, and flame and smoke retardants and other additives can be requested.

Fibertech Makes It Simple

Because Fibertech components are lightweight (approximately 2.5 lbs./sq. ft.), they require less structural support than heavy conventional materials. They are easier to ship, handle and install, and thus eliminate the need for heavy-duty crane installation and reduce many other infrastructure and equipment costs. **To ensure ease of installation and outstanding performance, all Fibertech projects are supported by detailed shop drawings, CAD files, installation details and instructions, and proven technical support.**

Fibertech can specify and schedule even the most complex jobs accurately and cost-effectively.

For detailed information on the physical properties of Fibertech FRP components, along with comparisons of the properties of fiberglass to other building materials, contact Fibertech at 864.646.3000 or info@fibertech.net.
