flextuft[®]

recycled rubber tile

FlexTuft[®] is miles away from ordinary rubber tile. Made from recycled tires, it can withstand repeated water dousing, high traffic, heavy loading and exposure to the elements. May contribute to LEED[®] CI and NC credits MR 4.1, MR 4.2, MR 5.1, MR 5.2.

With FlexTuft rubber tile, what's good for the environment is also good for the most challenging indoor and outdoor settings. In fact, this durable, anti-slip flooring meets ADA recommendations for ramps, so it is ideal for foyers, exercise facilities and stairways – indoors and outdoors.

features and benefits

- > Modular tile units allow for diverse patterns in four popular color options.
- > Choose either vulcanized rubber backing or non-vulcanized backing.
- > Maintains easily – just vacuum regularly and spot clean as needed.
- > Outdoor installations may be hosed off and left to dry.
- > Durable, indoor/outdoor flooring has a lifetime delamination warranty
- > Exceeds ADA recommendations for slip resistance on flat surfaces and ramps.

Available in 12" x 12" tiles and 12" x 30" rolls
