ACRALIGHT... THE NAME IN SKYLIGHTS SINCE 1980

MOST COMPLETE LINE OF SMOKE VENTS IN THE INDUSTRY

- · Curb mounted or self-flashing models
- · Single or double wall insulated curbs
- · Cost-effective option to the code requirement for smoke vents
- 9" or 12" high self-flashing units available

COMMERCIAL • RESIDENTIAL • INDUSTRIAL • CUSTOM • ROOF HATCHES

ICC-ES RECOGNIZED SMOKE VENTS

ACRALIGHT... the name in skylights since 1980

The name ACRALIGHT™ represents more than 28 years of design and manufacturing skills, a management team with over 200 man-years experience and the dedication to take daylighting solutions to a higher, more innovative level.

We're using new and unique glazing materials designed specifically for daylighting. We've combined the most advanced computer-aided design capabilities with efficient manufacturing facilities and installation expertise; all backed with a solid commitment to quality and safety.

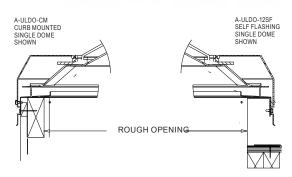

NanoStar® unit skylights and smoke vents are your green solution for unsurpassed energy-efficient performance. Reduce your heating, lighting and air conditioning costs with Nanogel filled panels that provide exceptional R-Values for unit skylights and smoke vents.

The newest member of the Acralight family of heat and smoke vents, Acralight's UL Listed drop-out heat and smoke vent provides a cost-effective option to the code requirement for smoke vents, utilizing the superior quality components you expect from Acralight.

So step up to the next level in skylighting with ACRALIGHT International Skylights.

ACRALIGHT - Greener Still.

Drop-Out Heat & Smoke Vent

NanoStar™Skylights/Smoke Vents are your Green Solution for Unsurpassed Energy-efficient Performance.

Green Benefits of NanoStar Skylights

- · Reduces energy consumption and emissions
- · Increases acoustic performance, reduces sound transmission
- · Design with more natural daylight and meet energy codes
- Exceptional thermal insulation performance, reduces solar heat gain

THERMAL PERFORMANCE OF UNIT SKYLIGHTS AND SMOKE VENTS WITH NANOGEL® AEROGEL FILLED PANEL

	Light Transmission	SHGC	R-Value
Clear Acrylic over 16mm Nanoge	71%	.57	5
Clear Acrylic over 25mm Nanoge	51%	.43	10
Clear Acrylic over clear Acrylic	92%	.89	1.7
Clear Acrylic over White Acrylic	52%	.61	1.7

All values recorded at center of skylight.

Flash Ignition Temperature of 750 degrees F (Test Method ASTM D-1929) Self-Ignition Temperature of 750 degrees F (Test Method ASTM D-1929) Smoke Density 0.3 (Per ASTM E662)

Surface Chemistry: Fully Hydrophobic (Repels water)
