Detail of AVCON's Classic Series

AVCON® reinforces all of its horizontal rails with metal

Founded in 1991, AVCON® has utilized the most advanced thermoplastic technologies, creating maintenance-free sustainable building product solutions that exceed all major national building codes. These unique products have been specially formulated to withstand the damaging effects of salt, chemicals, ultra-violet light, abuse and other site conditions.

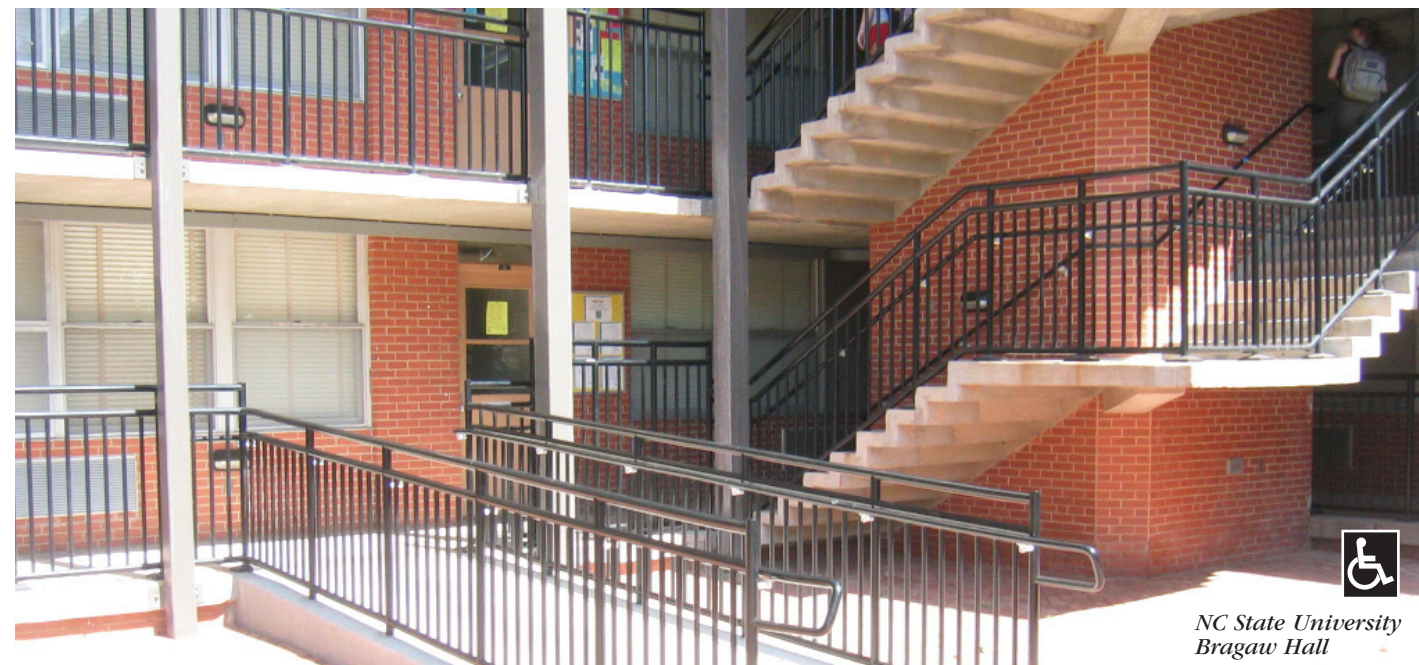

AVCON's Maintenance free products include a Thermoplastic Metal Reinforced railing system and Acrylic based bleacher covers. These products are designed to withstand the abuse of "high traffic" area's such as Amusement Parks, Professional & Minor League Ballparks, High Rise Residential towers, both interior and exterior, inland and on the coast.

When variety of design and color are paramount, AVCON's "Majestic Series" powder coated aluminum railing system offers a large variety of profile shapes and mounting applications allowing you to create a "look" unique to your design. The "Majestic Series" is manufactured using a superior quality Powder Coatings.

AVCON® is organized to assist you in engineering and design from concept through manufacture. Our "State of the Art" materials are complimented by our Computer Aided Design abilities. AVCON® stands poised to fulfill your railing requirements.

More information about AVCON's complete family of products is available at www.AVCON.com or by calling 800-24-AVCON.
