KNAPE & VOGT®

8450/8455 Soft Close Drawer Slide

The NEW KV 8450/8455 is a step forward in side mounted ball-bearing drawer slides. The KV 8450/8455 incorporates state-of-the-art Soft-Close technology. The fully integrated soft close module brings the drawer box to a smooth, quiet, secure close.

Additionally, KV is able to include the "soft-close" technology without changing the overall dimensions of the slide. This is a great advantage for the production of cabinets that currently use KV 8400 ball bearing slides. Also, many non-KV ball bearing slides share the same hole pattern making it easy to switch to the KV 8450/8455.

Like all Knappe & Vogt slides, the 8450/8455 is designed to meet or exceed ANSI performance standards as established by BIFMA, BHMA, and KCMA. As with all KV drawer slides the KV 8450/8455 is backed by a Limited Lifetime Warranty.

9400 Inline Undermount Drawer Slide

*KV collaborated with cabinetmakers in designing the fully featured **KV In-Line** - the first "true" full-extension, self-closing undermount slide with a fully-integrated "soft-close" feature and the most lengths available on the market today.*

It matches existing industry standards, so you don't have to change your current drawer configurations. It's packaged complete, making it easy to order. It meets BIFMA, KCMA and BHMA testing standards with a 75-lb. dynamic load class rating. A removeable dampener allows for cabinet construction and installation flexibility. With an ergonomically designed front release lever that features tool-less height adjustment, it's a cinch to select the KV In-Line Undermount Slide from Knappe & Vogt - a company backed by over 100 years of cabinetmaker confidence

Undermount Kitchen & Bath

To take advantage of the many innovative features of our 9400 Inline undermount slide, KV has redesigned several of its classic storage components from the ground up.

We are proud to introduce the next evolution of an old favorite: the KV SDS Susan Drawer System. We've integrated the smooth, soft-close functionality of sliding storage platforms into a precision engineered susan to create the new standard in premium kitchen storage.

KV's new undermount roll-out tray divider is another new twist: its classic look, precision construction, and ease of installation make it the perfect choice for kitchen upgrades and new construction. Its integrated 9400 mounting system means that installation takes only four screws.

Our undermount waste & recycling center combines the convenience of undercabinet waste storage with the smooth, soft-close features of a precision sliding platform.

Kitchen & Bath

Kitchen Storage

KV offers a complete line of kitchen and bath storage products designed to ease our messy, time-stressed, overflowing-with-stuff lives. Practical yet innovative. Hard-working yet graceful. Technically advanced yet user-friendly. Designed to take advantage of often-overlooked spaces and engineered to the highest standards.

Waste Management

Slide it. Spin it. Put a lid on it. Whatever you want in a waste and recycling product, you will find it here. KV has been an industry leader in kitchen waste management systems for years, offering the widest product lines in the industry— from large multi-bin recycling systems to compact undersink receptacles.

Shelving Systems

Residential, Commercial and Industrial Shelving

When Knap & Vogt first developed the Standard & Bracket shelving system, it revolutionized shelving. Overnight, shelving became flexible and functional in a way it had never been before.

Today, Standard & Bracket Shelving systems remain the most popular shelving solution to fit any lifestyle and any decor.

Knap & Vogt offers several complete shelving systems to accommodate the widest variety of storage needs— from decorative systems for the home to heavy-duty stainless steel systems for industrial applications.

Built-In Bookcase Pilaster and Components

In addition to Standards & Brackets, Knap & Vogt offers a complete line of pilaster, shelf clips and specialized fasteners for the construction of custom and built-in bookcases and shelving.
