YOUR VISION... OUR EXPERTISE... SINCE 1966

2009

In business since 1966, Patio Enclosures, Inc. is the nation's largest manufacturer & installer of sunroom related products. Our excellent Dun & Bradstreet rating is proof positive of the stability and integrity that Patio Enclosures, Inc. represents in today's market.

Our Employee-Owned Company has over 40 locations nationally to serve you. Each location is staffed with installation and service personnel. Installations are completed by employees who are professional installers who only install glass structures and Sunrooms. This affords us unique advantages and provides our customers unprecedented pride in workmanship, products and services with single source responsibility.

C.S.P., The Commercial Division Of Patio Enclosures, Inc. specifically engineers, manufactures and installs a variety of sunroom related products for numerous commercial applications.

Our products are utilized for restaurants, fitness centers, classrooms, reception areas, cafeterias, entryways, covered walkways, smoking rooms, conference rooms, break rooms, retail space and multi-housing to name a few.

Our products have the design flexibility to meet the exacting specifications and finishes of your project. An array of high-performance glazing further enhance your design flexibility.

All products are specifically engineered to be accepted by local required codes. Being a custom manufacturer means no limitation to just "stock" sizes, but rather C.S.P. provides an unlimited array of shapes and sizes. Utilizing our framing system allows us to create large open spaces, clear span, with no interior beams or columns. Also, several other roof styles are available, including our patented Comfort-Gard® flush roof glass panel, which is an integral part of our aluminum clad roof system, adding volumes of natural light to the space.

We insulate and temper our own glass systems and manufacture our own roof panels. With the addition of manufacturing our vinyl room, we have the most versatility and design flexibility afforded by any company. Our patented integral railing system for our screen room eliminates multiple contracts for railings on multi-story applications to enclose balconies.

C.S.P. has successfully completed structures throughout the world. Our team offers the experience to meet the changing requirements of our industry. Our continuous growth is reflected in our dedicated team members; including in-house licensed engineers and code officials, project managers and precision manufacturing. C.S.P.'s turnkey approach often brings about ideas for value engineering, leading to cost effective alternatives. A full line of blinds & shades are offered to complement the new space.

Whether your need is for new space or part of a plan to renovate existing space, C.S.P. will provide you the best product and service to accomplish your plans.

C.S.P. Service Areas

Fuller Village Senior Living

Our patented Integral Screen railing System is specifically engineered to be the cost effective way to enclose multi-story balconies. This product affords the installation of screened or glass balconies that incorporate an aluminum picket safety railing fabricated into the structural framework, eliminating the need for multiple contractors for this work, thereby increasing profits.

Sunspaces are highly desired by purchasers of Condominiums, Senior and Adult Communities and other Multi-Housing Communities. Utilizing an economical screen room or a glass enclosure will provide an open, airy living space which can be enjoyed free from insects and inclement weather.

Working closely with builders and developers throughout the country, our products provide additional value to your project, separating you from competitors. Our patented integral screen rail system is ideal for mid and high-rise complexes.
