

# GET YOUR CLUTCHES ON OUR NEW SL SERIES CLUTCH

## FEATURES:

The new SL series clutches are the newest premium clutch system available and are now available in the Genesis custom shade program.

The new clutch system features the smoothest operating clutch in a modern, sleek and rounded design. Visually there are slight differences from the existing clutch system to the SL clutch system. Painted brackets in white, vanilla and black will replace the cadmium brackets for clutch systems so the appearance at the window will be more appealing. The new SL Vertical Dual bracket is available for inside mounts only.

## INSTALLER BENEFITS:

Installers will notice the **BIGGEST** change because of the easier and quicker installation with the new clutch system. The hooked clutch, spring loaded pin-end makes installation easy with measuring being more forgiving. Nylon internal construction affords cleaner, brighter white appearance, quieter performance, added strength and durability.

This amazing new SL Series Clutch is within your reach. It is available in the Lafayette Interior Fashions Genesis custom shade program, including the Season Vue shades. Order your next shade with the SL Series Clutch!
