## "Finally...Affordable, Genuine Slate Roofing!"

The TruSlate™ system from GAF-Elk can make your client's dream of owning a genuine slate roof a reality. The TruSlate™ system features:

- **Real hand-split quarried slate** (not a synthetic imitation)
- **An affordable luxury** (often comparable to the cost of the cheap-looking imitations)
- **Perfect for new construction or remodeling** (because it typically eliminates the expensive structural modifications that old-fashioned slate requires)

# TruSlate™

"THE AFFORDABLE GENUINE SLATE"

**How did we do it?** On an old-fashioned slate roof, *half of each slate is never seen*, because it's tucked under the piece above it. We've replaced this wasted slate with a **high-tech waterproofing material**, reducing the weight of the system to approximately 550 lbs per square. With this ingenious design, the TruSlate™ system can be installed on almost **any roof**.

**It goes without saying**, before you specify your next roofing system, you owe it to yourself to consider the advantages of a genuine TruSlate™ roof. In fact, why even consider **a plastic imitation**, when you can specify the **real thing for about the same price**—and for only a fraction of the cost of old-fashioned slate?

**Selecting Your Color.** TruSlate™ roofing comes in five popular **Core Colors** and four **Accent Colors** to complement virtually any exterior color scheme. **Core Colors** can be used on their own, or they can be combined in varying amounts with other **Core Colors** or with **Accent Colors**. To see additional applications and different color combinations visit [www.gaf.com](http://www.gaf.com)

## Core Colors.

## Accent Colors.

*Note: Due to the inherent variability in natural slate (as well as the limitations of the commercial printing process), the actual color and texture of your TruSlate™ roof will vary from that shown here.*

## Compare The TruSlate™ System To Other Roofing Choices...

Made from real hand-split  
**quarried slate**

**Easy to install** for  
most roofing contractors

Cannot **curl** or **warp**

Easy and economical to  
**repair/replace**

Individual slates can be  
**rearranged** after installation

Maximum **wind warranty**  
up to 130 mph\*

**Affordably priced**  
versus old-fashioned slate

**Realistic slate appearance**  
and coloration

Natural **color aging**  
adds grace and charm

**Lifetime** ltd. warranty  
available on roofing system\*

"THE AFFORDABLE GENUINE SLATE"

## The TruSlate System™

Quality You Can Trust Since 1886... From North America's Largest Roofing Manufacturer™

### Attic Ventilation

**TruSlate™ Ridge Vent** helps remove excess heat and moisture from your attic that can raise your energy bills, cause premature peeling of interior paint and wallpaper, and even affect your health

### Trim Slates

**TruSlate™ Trim Slates** are designed specifically for the hip and ridge areas of your TruSlate roof. They provide added protection to these vulnerable areas and are a perfect complement to the color of your roof

### UV & Moisture Barrier

**UnderBlock™** UV & Moisture Barrier provides an extra layer of protection for your roof. It's made from ultra-tough high density polyethylene—the same material that's used in demanding environmental applications

### Roof Accessory Paint

**ShingleMatch™** premium accessory paint is a great option to help you "hide" unsightly roof accessories by making them blend in with the color of your slates... for a better-looking finished roof

### Batts & Hangers

Patented **TruGrip™** batts and hangers are designed to lock each slate tightly in place to help prevent blow-offs. Made from stainless steel to last the life of your roof

### Alignment Tape

**Lay-Straight™** alignment tape will help to keep your courses straight, for a better-looking finished roof

### Leak Barrier

**Weather Watch®** and **StormGuard®** provide exceptional protection against leaks caused by roof settling and extreme weather. Ideal upgrade at all vulnerable areas

### Roof Deck Protection

"Breathable" **Deck-Armor™** allows moisture to escape from your attic while providing an exceptionally strong layer of protection against wind-driven rain. It also lays flatter for a better-looking roof

## Fast, Easy Installation

**1** Apply Leak Barrier And Roof Deck Protection

**2** Install Ridge Vent, Trim Slates, And Top Row Of Field Slates

**3** Install Battens & Hangers

**4** Insert UV & Moisture Barrier And Field Slates
