BuyLine 6168

Texas Quarries has provided distinctive Texas limestone since 1929, operating two quarries and a modern fabricating facility near Austin. With a customer list that includes clients from New York to California and from Canada to Japan, Texas Quarries provides superlative craftsmanship and unique limestone in a variety of styles and textures as expansive as the architect's imagination.

We quarry and fabricate limestone indigenous to Texas—Cordova Cream and Shell from the Hill Country, and Lueders from the Abilene area. Texas Quarries limestone has been the natural selection for countless public buildings, schools, hospitals, office buildings, monuments, and selected residences. Our limestone is available in a variety of finishes, and serves as an excellent choice for both interior and exterior applications.
