Between us, ideas become reality™

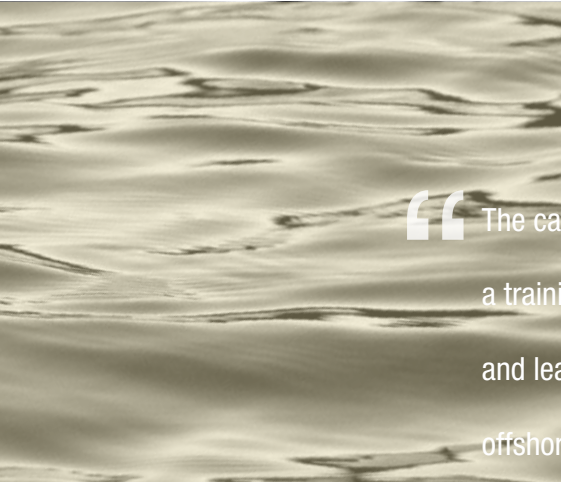

INFUSIONS®

Accent Canopies
Lay-in Panels,
Walls, and Wings

*ideas
reality*

“ The cafeteria was specifically designed for a training facility that enhances the technical and leadership skills of personnel working on offshore oil rigs. The curvature of the Infusions panels evokes the waves of the Gulf as well as coastal Louisiana. ”

Paul Homeyer, AIA, LEED® AP

Senior Associate – Gensler

evoke

Product: Infusions Accent Canopies
2' x 6' in Peace Blue with end-to-end linking kits
Project: Corporate Training Facility, Schriever, LA
Architect: Gensler, Houston, TX

reflect

“ The John Peace Library had not seen significant renovation since 1976. Students in the fortress-like concrete building complained of poor lighting, uncomfortable furniture, lack of study spaces, and a general absence of aesthetics. Key to the renovation project was the integration of technology to support new ways to research and learn. The curved metallic Armstrong Infusions panels reinforce the Library’s move forward into the digital age. The undulating curves have a strong visual impact, especially when reflected in the exterior windows, and help to signal that this building is once again significant. This is reflected by the usage rates which have skyrocketed from a few hundred to almost five thousand students per day. ”

James Hadden, LEED® AP

The Bommarito Group, Inc.

Product: Infusions Accent Canopies
2' x 5' in Perforated Alloy
Project: University of Texas at San Antonio,
John Peace Library, San Antonio, TX
Architect: The Bommarito Group, Inc., Austin, TX

spirit

“ We wanted the look and volume of an exposed ceiling while still having a ceiling cloud shape that offered visual interest and helped maintain proper lighting levels. Using the transparent panels in the shape of a large ‘AU’ accomplished that goal and also highlights the Ashland

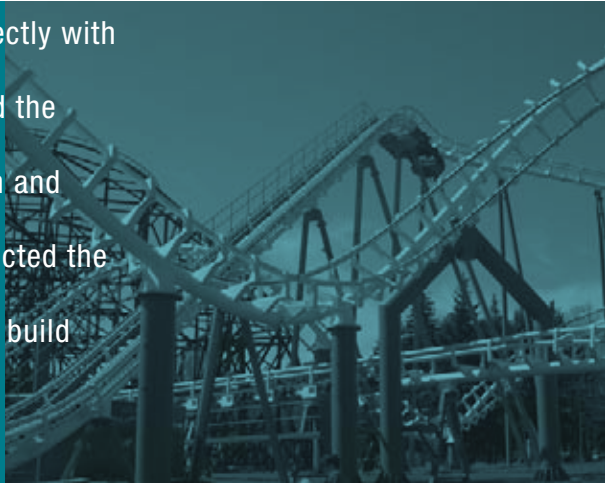

University athletic spirit. ”

*Lisa Crawford-Nusser, IIDA, LEED® AP BD+C
Senior Interior Designer - The Collaborative Inc*

Product: Infusions Lay-in 2' x 2' in White Circlets
with 12" Classic Axiom® and Suprafine® suspension system
Project: Ashland University, Ashland, OH
Architect: The Collaborative Inc, Toledo, OH

whimsy

“ We originally chose to use these canopies because we loved the movement and the whimsy they created in this large angular space. Plus, the color tied in perfectly with the client’s logo design! We linked the canopies because it created depth and interest in the space and also directed the eye into the workshop where they build the roadsters. ”

Evey Nikolas

Principal – aen designs

Product: Infusions Accent Canopies
4' x 10' in Channeled Midnight
Project: Roadster Shop, Mundelein, IL
Architect: aen designs, Chicago, IL

LER

“ The central colonnade in the Student Center forms the main organizational feature of the building, creating a pedestrian path that links the Eastern Connecticut State University campus together. It was important that the space be

welcoming and filled with light. The Infusions Canopies reinforced the barrel-vaulted shape of the ceiling, and helped to provide the luminosity that we were looking for. ”

Lisa Keskinen

Project Manager – Svigals + Partners

welcome

2' x 6' in Crystalline Focus

Project: Eastern Connecticut State University, Willimantic, CT

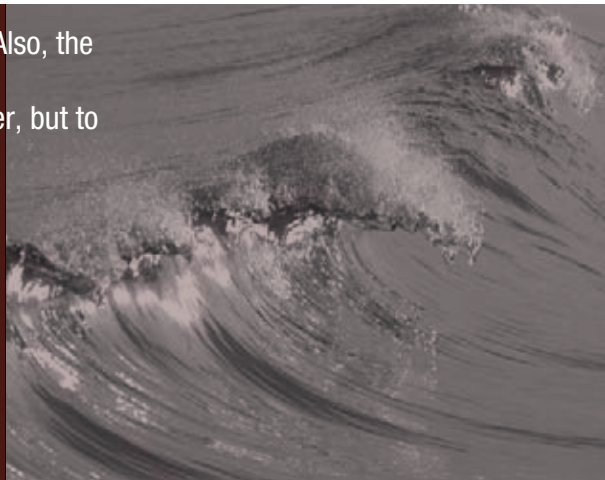

Architect: Svigals + Partners, New Haven, CT

movement

“ Kauffman Stadium’s iconic feature is its 322-foot wide water spectacular, which shoots into action during key plays of the baseball games. We selected the Infusions Canopies to bring the idea of water movement into the entry lobby, the first interior experience of the ballpark, which incorporate well with the native limestone feature walls and demonstrate the continuity between earth and water. Also, the translucent blue calls not only to water, but to the Royals’ primary team color. ”

*Kara Boshart, NCIDQ, LEED® AP
Associate - Populous*

Product: Infusions Accent Canopies 2' x 6'
in Indigo Surf with side-to-side linking kits
Project: Kansas City Royals, Kauffman Stadium
Kansas City, MO
Architect: Populous, Kansas City, MO

play

“ We were looking for a suspended ceiling above the circulation desk at the Children’s Library that would be both playful and allow daylight from clerestory windows above to pass through. Infusions Clear Arbor Lay-in panels accomplished both objectives and we couldn’t be more pleased with the result. ”

*Mark McCormick, AIA
Principal – McCormick Architects + Designers*

INFUSIONS® Accent Canopies, Lay-in Panels, Walls, and Wings

Key Selection Attributes

- Define spaces, accentuate an area, provide focus, and create ceiling artwork with Infusions Canopies, Lay-in Panels, Partitions, Walls, and Wings
- Over 70 fun and flavorful design and color options
- Mix and match sizes, shapes, patterns, prints
- Seven bright solid colors coordinate with SoundScapes® Acoustical Canopies and Shapes
- Standard components allow you to create customized visuals
- Canopies available in 2' x 5', 2' x 6', and 4' x 10' sizes with 4 arc options
- Lay-in panels available in 1' x 4', 2' x 2', and 2' x 4' sizes
- Wall and Partitions panels available in 2' x 8' and Wings panels in 2' x 4' sizes
- 4' x 6' Polycarbonate and 4' x 8' PETG sheets available for coordination with Infusions Canopies, Lay-in panels, and Partitions. For more information about custom options, contact the Architectural Specialties team at 877 ARMSTRONG and select options 1-1-4
- Durable: Impact-resistant, strong edges
- Fast and simple installation with no special tools required
- Infusions ceiling systems offer the industry's highest fire performance; panels meet both the Class A and IBC drop-out requirements for fire performance (drop-out tested to withstand 200° temperatures for 30 minutes)
