Section 07 41 13 - METAL ROOF PANELS  

#### 1. PRODUCT NAME

#### 2. MANUFACTURER
Metal Sales Manufacturing Corporation  
545 South 3rd Street, Suite 200  
Louisville, KY 40202  
Toll Free: 800.406.7387  
Phone: 502.855.4300  
Fax: 502.855.4200  
Web: www.metal sales.us.com  
E-Mail: info@metal sales.us.com

#### 3. PRODUCT DESCRIPTION

**Basic Use**  
For more than 50 years, Metal Sales has earned a reputation as the premier provider of metal building components and accessories. Metal Sales maintains the industry's largest professional sales and service team, supported by 21 branches located throughout the United States, and offers a full line of high quality metal roof and wall panels for agricultural, commercial, architectural, industrial, and residential projects of every shape and size for both new construction and retrofit applications. Metal Sales is dedicated to leading the metal building component industry, by setting new standards for operating efficiency, product design, active service management and lasting value.  

**Manufacturer Memberships and Affiliations**  
CRRC - Cool Roof Rating Council  
MCA - Metal Construction Association  
CSI - Construction Specifications Institute  
MRA - Metal Roofing Alliance  
NRCA - National Roofing Contractors Association  
USGBC - United States Green Building Council  
ENERGY STAR® Partner

#### 4. TECHNICAL DATA

**Applicable Standards**  
- ASTM A 331 - Standard Specification for Steel Bars, Alloy, Cold-Finished.  
- ASTM A 653 - Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvalume) by the Hot-Dip Process.  

**Approved Standards**  
- ASTM E 2140 - Standard Test Method for Water Penetration of Metal Roof Panel Systems by Static Water Pressure Head.  

**Approvals**  
- Factory Mutual (FM): FM Approval 4471:  
  - Class 1 Panel Roofs Magna-Loc.  
- Underwriters Laboratories (UL):  
  - UL 580 - Tests For Uplift Resistance of Roof Assemblies.  

**Miami-Dade County:** Code Approvals, Notice of Acceptance (NOA).  
- Magna-Loc product: NOA 08-1306.04 and NOA 08-1306.08  
- State of Florida: Florida Building Code 2010:  
  - Magna-Loc product: 10999.2, 10999.6, 11560.6, 11560.8.  
- State of Texas: Windstorm Evaluation:  
  - Magna-Loc product: RC-197

**Physical Properties:**  
Test reports are available to design professionals upon request.
Note: Industry designation for material thickness is moving away from “gauge” to “nominal thickness” in inches. Manufacturer’s available panel thickness is 0.022 inch (formerly 26 ga.) or 0.028 inch (formerly 24 ga.) or 0.034 inch (formerly 22 ga.). Manufacturer recommends use of a “minimum coated thickness” requirement of 0.018 inch (0.46 mm) instead of 26 ga., 0.023 inch (0.58 mm) instead of 24 ga., and 0.0296 inch (0.75 mm) instead of 22 ga.

Technical Properties for Magna-Loc and Magna-Loc 180 products:
Complies with requirements of ASTM E 1514 (steel) or ASTM E 1637 (aluminum).
► Panel Coverage: 16 inches (406.4 mm) or 18 inches (457.2 mm)
► Rib Height: 2 inches (50.8 mm)
► Material: Aluminum-zinc alloy-coated steel sheet, ASTM A 792, Class AZ50 coating designation, Grade 50, structural quality, 0.023 inch (0.58 mm) or 0.0296 inch (0.75 mm) minimum thickness
► Minimum Roof Slope Capability: 1/2:12
► Sealant: Factory-applied side lap sealant
► Side Lap: Mechanically seamed
► Attachment: Concealed clip designed for thermal movement
► Insulation Capacity: Accommodate blanket insulation 1/2 inch to 6 inches (12.7 to 152.4 mm) thickness
► Application: Applied over open framing or solid substrate
► Surface Finish: PVDF (Kynar 500®) or Acrylic Coated Galvalume.
► Color: See list of available colors. Contact Metal Sales for more information.

Aged Copper (65)
Antique Patina (M1)
Ash Grey (25)
Brandywine (P8)
Champagne Metallic (168)
Classic Green (66)
Colonial Red (W75)
Copper Penny (W92)
Dark Bronze (50)
Felt Green (W66)
Hemlock Green (M7)
Khaki (88)
Linen White (81)
Mansard Brown (133)
Matte Black (106)
Medium Bronze (H4)
Metallic Silver (K7)
Mistique Plus (W31)
Ocean Blue (35)
Old Town Grey (W25)
Old Zinc Grey (W29)
Parchment (W74)
Patina Green (W58)
Patriot Red (73)
Regal Blue (W35)
River Teal (S9)
Sandstone (W51)
Slate Grey (W38)
Snowdrift White (W81)
Tahoe Blue (W71)
Terra Cotta (W72)
Weathered Copper (W50)

Air Leakage: Tested according to ASTM E 1680
Water Penetration: No leakage when tested according to ASTM E 1646 and ASTM E 2140
Wind Uplift Resistance: Tested according to ASTM E 1592 and in compliance with UL 580, Class 90
Wind Evaluation: Complies with requirements of Texas Windstorm Evaluation RC-197

Technical Properties for Curved Magna-Loc 180:
Curving of Magna-Loc 180 panels may be performed in the factory or on project site
► Panel Coverage: 16 inches (406.4 mm)
► Rib Height: 2 inches (50.8 mm)
► Material: Aluminum-zinc alloy-coated steel sheet, ASTM A 792, Class AZ50 coating designation, Grade 50, structural quality, 0.023 inch (0.58 mm) minimum thickness
5. INSTALLATION

Handling and Storage
Handle and store product according to Metal Sales recommendations. Deliver materials in original, unopened, undamaged containers with identification labels intact. Store materials above ground, under waterproof covering, protected from exposure to harmful weather conditions and at temperature and humidity conditions recommended by manufacturer. Provide proper ventilation of metal panel system to prevent condensation build-up between each panel and other miscellaneous roof panel support members and anchor according to metal roof panel manufacturer’s recommendations.

Underlayment Installation
Install self-adhering sheet underlayment and felt underlayment as required. Apply slip sheet over underlayment prior to installing metal roof panels. Install flashing in compliance with requirements in Division 07 Section “Sheet Metal Flashing and Trim.”

Thermal Insulation Installation
Install polyethylene vapor retarder if required. Install board insulation if required, in compliance with installation requirements in Division 07 Section “Thermal Insulation.” Install blanket insulation if required, in compliance with installation requirements in Division 07 Section “Thermal Insulation.”

Metal Roof Panel Installation
Verify that site conditions are acceptable for installation. Do not proceed with installation until unacceptable conditions are corrected. Comply with panel manufacturer’s installation instructions including but not limited to special techniques, interface with other work, and integration of systems. Fasten metal roof panels to supports with concealed clips at each standing-seam joint at location, spacing, and using proper fasteners as recommended by panel manufacturer. Comply with installation tolerances as required.

Accessory Installation
Install accessories using techniques recommended by manufacturer and which will assure positive anchorage to building and weather tight mounting. Provide for thermal movement. Coordinate installation with flashings and other components. For Flashing and Trim, comply with performance requirements, manufacturer’s written installation instructions, and the SMACNA “Architectural Sheet Metal Manual.” Provide concealed fasteners where possible, and install units to true level. Install work with laps, joints, and seams that will be permanently watertight.

Field Quality Control
If requested by Owner, provide manufacturer’s field service consisting of product use recommendations and periodic site visits for inspection of product installation in accordance with manufacturer’s instructions.

Precautions, Cleaning and Protection
Touch-up paint is used to cover and protect unexpected scratches on the paint finish that may occur during installation of panel. Touch-up paint will not weather as well or at the same rate as the original system. Test in an area that will not be noticeable. Metallic paint colors are available at an additional charge. Minor differences in color and appearance are normal and to be expected. To minimize possible differences in appearance, an entire project should be painted at one time, from one batch of paint, using the same application equipment. Additionally, fabricated panels, flat sheet, and flashings should be oriented in the same direction. After installation remove temporary coverings and protection of adjacent work areas. Repair or replace any installed products that have been damaged. Clean installed panels in accordance with manufacturer’s instructions prior to Owner’s acceptance.
Remove and lawfully dispose of construction debris from Project site. Protect installed product and finish surfaces from damage during construction.

Building Codes
Current data on building code requirements and product compliance may be obtained from Metal Sales technical support specialists. Installation must comply with the requirements of authority having jurisdiction.

6. AVAILABILITY AND COST
Availability
Metal Sales products are nationally distributed and supported from 21 convenient locations nationwide, including Alaska. Metal Sales has the ability to ship worldwide. Contact Metal Sales for information on local availability.

Cost
Budget installed cost information may be obtained from a local Metal Sales distributor or through the manufacturer.

7. WARRANTIES
Weather Tightness Warranty
Metal Sales Weather Tightness Warranties are available in several forms. Request sample warranty documents from manufacturer for review and editing assistance. Metal Sales warranty excludes failure due to physical damage and surface deterioration due to exposure to salt air environments. Warranty Period is optionally 5, 10, or 20 years.

Type 1 Warranty:
Side-lap warranty only, with dollar limit.

Type 2 Warranty:
Trim and side-lap warranty, with dollar limit.

Type 3 Warranty:
Side-lap warranty only, with no dollar limit.

Type 4 Warranty:
Trim and side-lap warranty, with no dollar limit.

Premier Plus Warranty:
Single-source warranty, with no dollar limit.

Paint Finish Warranty
Metal Sales’ standard PVDF (Kynar 500®) Fluorocarbon System Warranty for film integrity, chalk rating and fade rating in which manufacturer agrees to repair or replace panels that show evidence of deterioration within specified warranty period. Deterioration shall include but is not limited to color fading of more than 5 Hunter units when tested according to ASTM D 2244, chalking in excess of a No. 8 rating when tested according to ASTM D 4214 or cracking, checking, peeling or failure of paint to adhere to bare metal. Warranty Period for film integrity is 45 years and for chalk and fade rating is 35 years.

8. MAINTENANCE
No specific maintenance is required for properly installed Metal Sales standing seam panel products. Periodic roof inspection to verify system integrity, drainage functionality and repair of storm damage is advised.

9. TECHNICAL SERVICES
Technical assistance, including more detailed information, product literature, test results, project lists, assistance in preparing project specifications and arrangements for application supervision, is available by contacting Metal Sales.

10. FILING SYSTEMS
Additional product information is available from the manufacturer upon request.
