In Aug. 2013 Inc. magazine ranked VIVA RAILINGS. #973 on its annual Inc. 500/5000, an exclusive ranking of the nation's fastest-growing private companies.

In August 2012 Inc. magazine had ranked VIVA RAILINGS #281 on its 31st annual Inc. 500/5000, an exclusive ranking of the nation's fastest-growing private companies.

"VIVA Railings is thrilled to earn a position on this prestigious list of companies!"

It's a great tribute to the hard work of all our employees and the confidence our customers have entrusted in us."

-- Mark Tinwala & Huzefa Tinwala

Viva Railings was able to provide multiple railing styles and finish options for the project team to review, in order to determine the best fit for this project, and at a value that could not be matched.

Andrew Earhart - Project Manager - THE BECK GROUP

I wanted to take a quick moment to congratulate the VIVA team for a Job Well Done with the ornamental railing installation at the University of North Texas Business Leadership Building. We at Hunt Construction Group were extremely pleased with the professional conduct of your entire team from proposal to design, with a seamless transition through material delivery and installation. The entire Hunt BLB project team is pleased with more than 2500 feet of the VIEW™, SHOE™ and Custom Mesh Railing system throughout the project.

Clint Binkley - Project Manager - HUNT CONSTRUCTION GROUP, INC.

Viva railings is a very good product, but beyond the product the support that we receive from Viva is great. They are ready to work with us at all times, and always have good recommendations that do not affect the design intent but make our budgets get farther. We have used their products in several projects, and the final result is always beyond the highest expectations. I believe this is due to the amazing level of professionalism from their installers and engineering team.
